Overview

Customizable template for federal government agencies seeking the construction of one or more on-site solar PV systems. Because solar systems produce energy on site, they involve unique issues and processes. They include connecting the solar system to both an electrical system and building, understanding. In response to increased State goals and targets to reduce greenhouse gas (GHG) emissions, meet air quality standards, and achieve a carbon free grid, the California Public Utilities Commission (CPUC), with authorization from the California Legislature, continues to evaluate options to achieve. Visit USA. Select the plus sign in the. chapter offers procurement information for projects that include an energy storage component.

[Energy Storage Procurement Study](#)

Chapter 1 (Market Evolution) provides historical policy and planning context to the evolution of California's market for stationary energy storage from about 2010 when California Assembly Bill 2514 ...

[Solar Equipment Lists Program , California Energy Commission](#)

The Energy Commission's Solar Equipment Lists include equipment that meets established national safety and performance standards. These lists provide information and data that support ...

Energy Storage

Energy Storage Legislation
Energy Storage Procurement to Date
Energy Storage Procurement Evaluation
Scaling Up and Crossing Bounds
Energy Storage Proceedings
Other Energy Storage Related Rulemakings
Additional Resources
To date the CPUC has approved procurement of more than 1,533.52 MW of new storage capacity to be built in the State. Of this total 506 MW are operational. The AB 2514 mandate is procured in three distinct grid domain targets, with some flexibility between the grid domain targets of customer sited, distribution-connected, and transmission connected .See more on cpuc.ca.gov
