

# 20 million kilowatts of new energy storage

## Overview

---

The country aims to achieve more than 180 million kilowatts of installed new-type energy storage capacity by 2027, which is expected to drive approximately 250 billion yuan (about 35. dollars) in direct project investment, according to the plan jointly released by the. BEIJING, Sept. The 'Special action plan for large-scale construction of new energy storage (2025-2027)' was published last Friday (12 September). China's new energy storage capacity has exceeded 100 million kilowatts, marking a major milestone in the nation's transition toward a new-type energy system and consolidating its global lead in renewable energy development, officials said at an energy storage sub-forum on Wednesday. "These facilities are designed to work with photovoltaic power generation.

## 20 million kilowatts of new energy storage

---

[my country's new energy storage installed capacity has exceeded 70](#)

By the end of 2024, the cumulative installed capacity of new energy storage projects that have been completed and put into operation nationwide has reached 73.76 million kilowatts/168 million kilowatt ...

[China surpasses 100 million kW in new energy storage](#)

China's new energy storage capacity has exceeded 100 million kilowatts, marking a major milestone in the nation's transition toward a new-type energy system and consolidating its global lead ...

- ✓ 50KW/100KWH
- ✓ HIGHER POWER OUTPUT IN OFF-GRID MODE
- ✓ CONVENIENT OPERATION & MAINTENANCE
- ✓ PRE-WIRED

[China's three-year action plan for new energy storage construction ...](#)

By 2027, new energy storage is expected to achieve large-scale, market-oriented development, with innovation levels and equipment manufacturing capabilities ranking among the top ...

[China sets target: New energy storage installed capacity to reach over](#)

The Action Plan sets development targets for new energy storage from 2025 to 2027, projecting that over 100 GW of new installed capacity will be added nationwide within three years, ...

[China targets 180GW of installed BESS capacity by 2027](#)

The policy and regulatory roadmap is aimed at pushing China's installed base of large-scale energy storage - primarily lithium-ion battery energy storage systems (BESS) - to 180GW by ...

[Energy Transition: Officials: China's new energy storage sector](#)

China's renewable energy storage sector is developing rapidly, with installed capacity in operation exceeding 30 million kilowatts of power by the end of 2023. That's the key message from ...

[China's new energy storage capacity exceeds 70 million KW](#)

China's new energy storage sector has seen a rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy Administration (NEA).

[China unveils three-year action plan to boost new-type energy storage](#)

China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure ...

[China leads the world in new-type energy storage capacity](#)

According to China's National Energy Administration (NEA), by the end of 2024, the total installed capacity of new energy storage projects in China reached 73.76 million kilowatts, ...
