

# 255 photovoltaic panels are good or not

## Overview

---

The pros of using solar panels include a lower carbon footprint, lower electric bills, potentially higher home value and tax credits. We may earn revenue from the products available on this page and participate in affiliate. Solar panels are an upfront investment that can save homeowners a significant amount of money in energy costs over the life span of the panels. With current tax credits and incentives, the average payback period for solar panels is between six and 10 years.
