

# 2MWh Energy Storage Container for Field Operations

## Overview

---

A high-capacity, 2 megawatt-hour battery energy storage system integrated into a standard 40ft container. Designed for large-scale renewable integration, peak shaving, and grid stabilization, it features advanced BMS, thermal management, and fire protection systems. Moreover, with efficient thermal management design and fire protection system, it ensures reliable performance and. Adopts All-in-One design and integrates battery modules, intelligent Power Conversion System (PCS), Power Distribution Unit (PDU), Liquid cooling system, Temperature Control System (TCS), and intelligent Monitoring System (IMS) by one-stop in the container of international standard size. Module. Fully integrated system with minimum on-site installation and commission efforts High energy density: 4.
