

Air compression energy storage projects under construction

Overview

Compressed-air energy storage, a decades-old but rarely deployed technology that can store massive amounts of energy underground, could soon see a modern rebirth in California's Central Valley. In April, the Huaneng Group completed a 300 MW/1500 MWh compressed air energy storage (CAES) project in Hubei, China, which took two years to build and cost \$270 million. On Thursday, the Biden administration offered a \$ 1. 76 billion conditional loan guarantee for GEM. Toronto-based Hydrostor Inc. is one of the businesses developing long-duration energy storage that has moved beyond lab scale and is now focusing on building big things.

Air compression energy storage projects under construction

[Storing energy with compressed air is about to have its moment of truth](#)

For this year and next, the long-duration storage technologies likely to see the fastest adoption are compressed air storage and flow batteries, according to BloombergNEF.

[CEEC-built World's First 300 MW Compressed Air](#)

...

The world's first 300 MW compressed air energy storage (CAES) demonstration project, "Nengchu-1," was fully connected to the grid in Yingcheng, central China

[World's largest compressed air energy storage goes online in China](#)

CAES and advanced-CAES (A-CAES) technologies are being used for the world's largest non-lithium, non-PHES energy storage projects in advanced development or construction today.

[Advanced Compressed Air Energy Storage Systems: Fundamentals ...](#)

The comparison and discussion of these CAES technologies are summarized with a focus on technical maturity, power sizing, storage capacity, operation pressure, round-trip efficiency, ...

[Top 7 Compressed Air Energy Storage startups 2026](#)

CAES startups create energy storages using compressed air. Hydrostor is a creator of Advanced Compressed Air Energy Storage (A-CAES) - long-duration, emission-free, economical ...

[China's innovative 1.2 GWh compressed air energy storage project](#)

A state-backed consortium is constructing China's first large-scale compressed air energy storage (CAES) project using a fully artificial underground cavern, marking a major step in the ...

[World's largest compressed air energy storage project opens](#)

The world's first non-supplementary fired compressed air energy storage power station is now sending electricity to the grid in China.

[Massive underground air-battery project lands \\$1.76B DOE award](#)

Compressed-air energy storage, a decades-old but rarely deployed technology that can store massive amounts of energy underground, could soon see a modern rebirth in California's ...

[China Developing World's Largest Compressed Air Energy Storage ...](#)

In April, the Huaneng Group completed a 300 MW/1500 MWh compressed air energy storage (CAES) project in Hubei, China, which took two years to build and cost \$270 million. The ...

[China's innovative 300 MW compressed air energy storage project](#)

A Chinese state-led consortium is developing a 300 MW/1200 MWh compressed air energy storage (CAES) project in Xinyang, Henan province, featuring an entirely artificial ...
