

Andorra city electricity policy

Overview

8% across most bands, adding €1-2/month for households; subsidised rate frozen. Envalira tunnel tolls rise 2-2.5%, property tax 3%, dog ownership 7%; tobacco jumps 20%. Electricity tariffs up 2. Energy policies in Andorra are shaped by the country's geographic and political context, being landlocked and dependent on Spain and France for energy supplies. For these reasons, the Consell General unanimously approved Law 21/2018, on the 13th September, on the promotion of the energy transition and climate change (Litecc), based on four fundamental pillars: economic growth, user protection and information, environmental sustainability. Andorra (Pyrenees) approved two new regulations to boost the production and self-consumption of electricity from renewable sources. Regulation of electricity generation: favours national energy production and its diversification by promoting new economic sectors. In the medium term it will help. The proposed project will combine wind, solar, battery energy storage and green hydrogen to help local industry decarbonise. It includes an option to expand the connection to 1,200MW. [pdf] How. This report offers guidance on how to prepare regions and cities for the transition towards a climate-neutral and circular economy by 2050 and is directed to all policymakers seeking to identify and implement concrete and ambitious transition pathways. The strategy is divided into five programmes: 1) decarbonisation, 2) raising adaptation and resilience capabilities, 3) enable carbon credits and other fiscal measures that can lead to carbon.
