Annual power generation of wind solar and energy storage power st

[U.S. Grid Energy Storage Factsheet](#)

Annual PHS additions have nearly doubled since 2022. PHS provides 90% of global EES capacity, 19 and 96% in the U.S. 20 PHS share of U.S. utility-scale power capacity dropped from 93% in 2019 to ...

[EIA: 99%+ of new US capacity in 2026 will be solar, wind + storage](#)

Solar, wind, and batteries are set to supply virtually all net new US generating capacity in 2026, according to the latest EIA data.

[Solar, battery storage to lead new U.S. generating capacity additions](#)

In 2025, we expect 7.7 GW of wind capacity to be added to the U.S. grid. Last year, only 5.1 GW was added, the smallest wind capacity addition since 2014. Texas, Wyoming, and Massachusetts will ...

[Renewable electricity - Renewables 2025 - Analysis](#)

Among all technologies, wind is impacted most, with both offshore and onshore capacity growth revised down by almost 60% (57 GW) over the forecast period. The forecast for solar PV capacity has been ...

[Electricity production by source, World](#)

Where in the world do people emit the most CO2? Which countries get the most electricity from low-carbon sources? Why did renewables become so cheap so fast? How have things changed? When ...

[Renewable energy statistics 2025](#)

Data on renewable power capacity represents the maximum net generating capacity of power plants and other installations that use renewable energy sources to produce electricity.

[Solar, batteries, wind to make up 93% of 2025 US electricity capacity](#)

The US Energy Information Administration (EIA) projects 32.5 GW of solar, 18.2 GW of energy storage, and 7.7 GW of wind will be deployed this year. These additions will make up nearly ...

[A Decade of Growth in Solar and Wind Power: Trends Across the U.S.](#)

This report uses data from the EIA to analyze solar and wind capacity and generation over the past decade (2014 to 2023) in all 50 states and the District of Columbia.

[America's Electricity Generation Capacity, 2025 Update](#)

The American Public Power Association's annual report on current and imminent electricity generation capacity in the United States breaks down the nearly 1.3 terawatts of utility-scale capacity by fuel, ...

[US Electricity 2025 - Special Report](#)

The US clean electricity transition continued as wind and solar generated more than coal for the first time. Electricity demand growth sped up and solar generation rose more quickly than gas ...
