

Can lockers be set up in the power distribution room

Overview

To re-cap Article #1 from March 5th and as required by OSHA, NFPA and the NEC: "working space around electrical enclosures or equipment shall be adequate for conducting all anticipated maintenance and operations safely, including sufficient space to ensure the safety of personnel. To re-cap Article #1 from March 5th and as required by OSHA, NFPA and the NEC: "working space around electrical enclosures or equipment shall be adequate for conducting all anticipated maintenance and operations safely, including sufficient space to ensure the safety of personnel. Frequently, people associate an electrical room with Article 110 of the National Electrical Code® (NEC®). More specifically, they associate it with section 110. 26 deals with what it calls working space about electrical equipment. I am working on a job where the supervisor wants to install recpts in metal personal storage lockers in a locker room. These provisions apply to: Power generation, transmission, and distribution installations, including related equipment for the purpose of. The answer is a locker – but, as not all employees typically visit the office on the same days – a traditional locker set up can result in a lot of wasted space.

Can lockers be set up in the power distribution room

[Power Distribution Equipment](#)
