CE  FC 

Overview

Age Consideration: For individuals under 60, the extended timeline often required for break-even aligns better with a solar investment. Those over 60 might still benefit if the other factors align well, but they should weigh the payback period against their plans for. But what if you're not sure if you'll be in your home for 7-10 years?

Going solar in your golden years can be daunting, but it can also be a way to free up fixed income, increase your home value, and add to your legacy. In this article, we'll explore the benefits and road bumps of going solar later. While installing solar panels on any property comes with its own set of challenges, older properties require much more care before you can safely make the switch. It seems that everyone is offering free solar, but there is nothing free about it. Let's take a look! Solar power is an increasingly popular home upgrade, especially among retirees looking to save on energy costs and reduce their environmental impact. Crown molding, original hardwood, cozy porches—they just don't build them like that anymore.
