

Can solar panels be used for home power generation

Overview

Homeowners can run their homes using solar power instead of taking energy from the grid, which lowers energy bills and carbon footprints. A home solar energy system costs between \$18,000 and \$20,000 before any incentives and typically saves homeowners around \$1,500 annually. Solar projects are making it easier for Americans to choose solar energy to power their homes. Solar energy is not a simple impulse purchase, but rather a multi-decade commitment that requires a unique solution for.

Can solar panels be used for home power generation
