

# Chile anti-dumping solar glass

## Overview

---

In Q2 2023, Chile's National Anti-Dumping Commission initiated a probe into imported photovoltaic glass following complaints from domestic manufacturers. The investigation primarily targets Chinese suppliers accused of selling below fair market value. Following the publication of a Notice of impending expiry (1) of the anti-dumping measures in force on the imports of solar glass originating in the People's Republic of China ('the country concerned'), the European Commission ('the Commission') has received a request for review pursuant to Article. Summary: Chile's recent anti-dumping policies on photovoltaic glass have reshaped the solar energy market. Commerce is also concurrently conducting a countervailing. The commerce ministry's investigation arm, DGTR, has recommended the imposition of anti-dumping duty for three years on the import of solar cells from China, with an aim to guard domestic players from cheap imports. The US International Trade Commission (ITC).
