

# China-Europe lithium battery energy storage

## Overview

---

China's lithium-ion battery exports surged 47% to 78 GWh through October 2025, driven by a 102% jump in stationary storage shipments and a 12% rise in EV battery exports. Europe accounted for over 40%, with CATL and BYD leading growth. China has a goal to install 180 gigawatts of battery energy storage systems by the end of 2027, with a direct project investment of \$35.8 billion. Note: Required spread for a two-hour battery project assuming revenues cover project costs of €360,000/MWh in 2024, for previous years assumes BNEF's Europe energy storage system costs. Assumes 90% round-trip efficiency, 85% depth of discharge. Where is the opportunity?

Source: BloombergNEF. Talk about having your cake and eating it too! Here's where it gets juicy - while the EU frets about lithium supply.

## China-Europe lithium battery energy storage

---

[China's power reforms, global data centre buildout usher in battery](#)

BEIJING, Dec 22 (Reuters) - A revamp of China's electricity market is boosting the economics of storing power just as international demand surges, sparking a boom for the Chinese ...

### Energy Storage in Europe

Global battery cell oversupply driven largely by China and is set to continue China lithium-ion battery cell production capacity overlaid by global lithium-ion battery demand

[THE CHINA BATTERY ENERGY STORAGE SYSTEM \(BESS\) ...](#)

Ahead and heading into a new era for new energy, it is expected that China's energy storage capacity and its BESS capacity in particular will grow at a CAGR rate of 44% between 2023 and 2027.

[China-Europe Energy Storage Collaboration: Powering the New ...](#)

Here's where it gets juicy - while the EU frets about lithium supply chains, Chinese engineers are retrofitting coal mines in Shanxi province with vanadium redox flow batteries.

[Securing Europe's battery future: Why China's LFP export ban must ...](#)

China's recent decision to restrict exports of lithium iron phosphate (LFP) and lithium manganese iron phosphate (LMFP) battery cathode active material technology is more than just a ...

[Long on expectations, short on supply: Regional lithium ...](#)

China, Europe, and the USA have ambitious EV plans, yet EVs depend heavily on lithium, raising concerns about supply allocation among regions amid potential global shortages.

[Winter Hits Europe, Energy Crisis Looms! How Chinese-Made Lithium ...](#)

Among numerous energy storage solutions, Chinese-made all-in-one systems with inverters, floor-standing batteries, and wall-mounted batteries have become "hottest sellers" in the ...

### [China's Lithium-ion Battery Exports Surge 47% to 78 GWh](#)

Europe remained the largest destination for Chinese battery cells, accounting for over 40% of total shipments. Europe's imports from China climbed 68% compared with the same period ...

### [China Targets 180 Gigawatts of Battery Storage by end of 2027](#)

3 If China reaches its goal, the country would have almost as much battery storage installed by the end of 2027 as the entire world did through September 2025, when total operational battery ...

### [Chinese restrictions threaten Europe's hopes of absorbing battery tech](#)

China has most recently used its dominance in the rare-earth supply chain to build pressure in negotiations with America and Europe. For its part, Brussels wants to lure Chinese firms ...
