

China electric vehicle market switzerland

Overview

The government of the People's Republic of China is aiming for a leading position in the production of electric cars and is home to two heavyweights in the market – the battery manufacturer CATL and the front runner BYD, which recently overtook Tesla in the quantity of. The government of the People's Republic of China is aiming for a leading position in the production of electric cars and is home to two heavyweights in the market – the battery manufacturer CATL and the front runner BYD, which recently overtook Tesla in the quantity of. Electric cars are widely seen as key to the energy transition and China is a giant in that market. But the critical minerals that power electric vehicle batteries come at a price to Indigenous Peoples and their environment, warns Christoph Wiedmer of the Society for Threatened Peoples. At Switzerland's largest motor show Auto Zurich 2024, which concluded Sunday, 70 brands showcased their latest models and technologies to over 64,000. Market Dominance Solidified: China's electric vehicle market has achieved unprecedented scale in 2025, controlling over 70% of global EV production with domestic sales exceeding 11 million vehicles in 2024, while market penetration has skyrocketed from 6. A first point of sale has already opened in Zurich, with 14 more to follow by the end of 2025. Like other European countries, the Swiss car market faced challenging conditions in.
