

Columbia High Voltage Inverter Specifications

Overview

These compact sine wave inverters are cooled by conduction and natural convection – no fans required. High voltage DC-AC sine wave inverters accept wide input ranges of 450V to 800Vdc. High frequency PWM technology enables high efficiency, compact construction and low weight. The PH1800 LV Series is a specialized 120V Output hybrid inverter designed for regions with 110V/120V grid standards (North America, Latin America). With a rated power of 3KW, it supports Parallel Operation of up to 3 units. A key feature is its ability to form a 120V/240V Split Phase system when. of operating parameters for a given invert r. Common specifications are discussed below. Maximum Input Current This is the maximum direct current that the inverter can utilize.
