

Construction approval procedures for communication base station inverters

Overview

This Guidance Note is intended to provide the operators with information on the requirements and procedures for obtaining such approvals. A structure or equipment at a fixed location that enables Commission-licensed or authorized wireless communications between user equipment and a communications network. The term does not encompass a tower as defined in this subpart or any equipment associated with a tower. These Procedures and Standards contain details of the construction aspects of cellular Mobile Base Stations and Towers and exposure to radio frequency electromagnetic fields. Sites and associated infrastructure. Installing a Base Transceiver Station (BTS) is a critical step in building mobile communication networks. Site Acquisition and Survey Objective: Select and acquire a suitable location for the BTS. Activities: Identify coverage gaps or expansion areas.
