

# **Cost of Grid-Connected Mobile Energy Storage Containers for US Base Stations**

## Overview

---

After coming down last year, the cost of containerised BESS solutions for US-based buyers will come down a further 18% in 2024, Clean Energy Associates (CEA) said. The National Laboratory of the Rockies's (NLR's) Storage Futures Study examined energy storage costs broadly and the cost and performance of LIBs specifically (Augustine and Blair, 2021). The costs presented here (and for distributed residential storage and distributed commercial storage) are based. The Department of Energy's (DOE) Energy Storage Grand Challenge (ESGC) is a comprehensive program to accelerate the development, commercialization, and utilization of next-generation energy storage technologies and sustain American global leadership in energy storage. The first battery, Volta's cell, was developed in 1800.
