

# Cuba Base Station Energy Storage Project

## Overview

---

BESS are Battery Energy Storage Systems that are used to store excess energy produced by solar farms during the day, allowing for its use when generation is low or demand is high. In Cuba, these batteries are being installed in electrical substations to enhance the stability of. On Saturday, Cuba initiated the installation of solar energy storage batteries at four electrical substations, marking a significant step in addressing its energy challenges. Through the social network X, the Minister responded to a post by the. Summary: The Santiago de Cuba Battery Energy Storage Project stands as a pioneering initiative to stabilize Cuba's power grid through advanced lithium-ion battery systems. This Energy Storage Best Practice Guide (Guide or BPGs) covers eight key aspect.
