

Di Solar Power Generation

Overview

DI Solar designs, develops, finances, builds and operates photovoltaic generators. For sale in full. Electricity generation by the U. electric power sector totaled about 4,260 billion kilowatthours (BkWh) in 2025. In our latest Short-Term Energy Outlook (STEO), we expect U. 6% in 2027, when it reaches an annual total of 4,423 BkWh. Whatever the technology and energy valuation model, DI Solar enables its customers to avoid mobilising their cash and debt capacity by financing all its photovoltaic. DIMO has introduced DI-Solar, a revolutionary solution, enabling the power generated through the existing solar PV systems to be utilized during the prevailing daytime power interruptions, thereby preventing power wastage.
