

Does the outdoor power supply need to be discharged after purchase

Overview

To ensure optimal performance and longevity, we strongly recommend completing a full charge before use. During the first three charging cycles, it's advisable to charge an extra 1-2 hours after the battery is fully charged. After receiving your GREEN POWER outdoor power supply, the first charge is crucial. Charge continuously until indicators show 100% (typically 5-8 hours).

Temperature: Avoid using in extreme high or low temperature environments, as extreme temperatures may affect battery performance or. Does a portable power supply have over - discharge protection?

As the head of quality assurance at Lvwo Energy, I ensure that every battery pack meets rigorous safety and performance standards. My work focuses on maintaining the highest level of product reliability across all applications.
