

Dominican Republic Centralized solar Energy Storage Policy

Overview

The Dominican Republic has launched a tender for up to 600 MW of solar and wind capacity, requiring projects to include at least four hours of battery storage to support stability in the National Interconnected Electric System (SENI). From ESS News The Superintendency of Electricity (SIE) has. The Dominican Republic is taking significant strides in its energy transition, with a strong emphasis on renewable energy and energy storage. Guided by an ambitious goal to reach 300. During the “Energy Sector Reform” Forum organized by the Dominican Association of the Electric Industry (ADIE) and the Technological Institute of Santo Domingo (INTEC), Edward Veras, executive director of the National Energy Commission (CNE), emphasized the Dominican Republic's progress in energy. sustainable development. As a result of these measures, the amount of energy generated from renewable sources has more than doubled e its energy security.
