

East African Electric Energy Storage System Base

Overview

ESA deploys large-scale BESS to help stabilise national grids, enable renewable firming, and provide clean, low-cost peak power. We are currently developing projects in Malawi (60MW/240MWh) and Kenya (120MW/480MWh), with a broader development pipeline across Sub-Saharan Africa. This report provides a comprehensive overview of the current status of the energy storage market in East Africa, highlighting key market drivers, technological advancements, regional project developments, and future trends. The study highlights the potential of ESS to address Africa's energy challenges, including grid instability, rural electrification, and. June 2023 This work is a product of the African Union Development Agency - NEPAD. Bankability and risk management are becoming central to storage deployment, particularly for utility-scale. Energy Storage Africa (ESA) is delivering the future of energy for Africa with Battery Energy Storage Systems (BESS).
