

Electric vehicle range israel

Overview

In Israel, all electric vehicles are tested against a standardised metric for range. The Worldwide Harmonised Light Vehicle Test Procedure (WLTP) measures the range of a car travelling at an average speed of 46. Amid steady growth in the automotive sector, the electrification boom has emerged as its defining trend. Our platform provides in-depth information about performance, range, charging capabilities, safety features, and technology innovations in the growing. We have compiled a list of electric vehicles available in Israel in 2023, as well as those that are just waiting to enter the market. We are forming our list at the end of January 2023, so models that appear later may not be included in it.
