

Electrical appliances that carry solar panels to generate electricity

Overview

Any electric appliance can be a solar appliance. Whether it's an electric vehicle charger, washer and dryer, solar water heater, or heat pump water heater, if it runs on electricity you can power it with clean, renewable energy from the sun. Did you know that a single solar panel can power essential home appliances like lights, fans, and even a TV?

As I explored solar energy options for my home, I was surprised to find that many common appliances, including washing machines and refrigerators, can run efficiently on solar power. But. In homes or other properties, solar panels, also known as photovoltaic (PV) panels, turn sunlight into electricity. They are typically installed on the building's roofs or nearby locations with direct sunlight exposure.
