## Overview

---

Global total shipments of lithium-ion batteries increased by 29pc from a year earlier to 1,545GWh in 2024, including 1,215GWh in China that rose by 37pc on the year and accounting for 79pc of the total. Chinese energy storage battery companies performed. Recently, the research organization EVTank, in collaboration with the China YiWei Institute of Economics, jointly released a White Paper on China Lithium-Ion Battery Industry Development (2025). This was mainly. In 2024, global Li-ion battery shipments reached an estimated 1,353 GWh. 7 percentage points higher than the figure we presented in September 2024. Electrochemical energy storage systems face evolving requirements. For transportation, the grid, and applications such as sensors, industry seeks lower-cost, higher-performance batteries with greater reliability and safety than those available in today's market. To address this need, PNNL plays a key role in developing new materials and processes that are.

## Electrochemical energy storage lithium battery shipments

### [Advancing energy storage: The future trajectory of lithium-ion battery](#)

By bridging the gap between academic research and real-world implementation, this review underscores the critical role of lithium-ion batteries in achieving decarbonization, integrating ...

### [China's Lithium Battery Sector Shifts Focus to Energy Storage Systems](#)

ESS batteries are at the forefront of a seismic shift in China's lithium battery industry, with major battery producers investing heavily in energy storage systems to counter slower growth in the ...

### [Electrochemical Energy Storage , Energy Storage Research , NLR](#)

Electrochemical energy storage systems face evolving requirements. Electric vehicle applications require batteries with high energy density and fast-charging capabilities. Grid-scale ...

### [The Global Lithium-ion Battery Shipment Volume in 2024 Reached ...](#)

According to the data presented in the paper, the global shipment volume of lithium-ion batteries in 2024 reached 1,545.1 GWh, marking a year-on-year increase of 28.5%. From the ...

### [Electrochemical Energy Storage , PNNL](#)

PNNL is leveraging fundamental science and industry engagements to deliver commercially relevant processes, technology, and systems for next-generation electrochemical technologies.

### [2024 Energy Storage Battery Cell Shipment Rankings](#)

In 2024, the global energy storage market continued its rapid growth, bolstered by policy support and increasing market demand. According to SMM statistics, global shipments of energy ...

### [Beyond Lithium: The Next Frontier In Energy Storage](#)

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity systems are shaping the future grid.

Standard 20ft containers

Standard 40ft containers

### [Global Li-ion battery shipments rise in 2024: EV Tank](#)

Global shipments of electric vehicle (EV) power batteries and energy storage batteries surged in 2024, and could continue growing until 2030, according to Chinese research institution EV Tank.

### [Global energy storage cell, system shipment ranking 1H24](#)

According to InfoLink's global lithium-ion battery supply chain database, energy storage cell shipment reached 114.5 GWh in the first half of 2024, of which 101.9 GWh going to utility-scale ...

### [Li-Ion Battery Shipments to Slow After Short-Term Uptick](#)

Read the latest forecast on global lithium-ion battery shipments, showing a near-term recovery followed by longer-term growth moderation.
