

Energy storage battery pack and energy storage system

Overview

A battery energy storage system (BESS), battery storage power station, battery energy grid storage (BEGS) or battery grid storage is a type of energy storage technology that uses a group of batteries in the grid to store electrical energy. Battery storage is the fastest responding dispatchable. Battery energy storage plays an essential role in today's energy mix. By leveraging advanced technologies like LiFePO₄ batteries, energy storage systems offer efficiency, reliability, and sustainability.
