

Energy storage equipment for construction sites in serbia

SUPPORT REAL-TIME ONLINE
MONITORING OF SYSTEM STATUS

Overview

This resume outlines the potential products and equipment that could be fabricated and assembled in Serbia for renewable energy projects in Europe. Atlas Copco's industry-leading range of Lithium-ion energy storage systems expands the spectrum of suitable applications and provides operators with increased options for power, taking modular energy storage to a new level. Designed with sustainability in mind, these units are suitable for. Serbia is currently making significant strides towards the integration of large-scale energy storage into its infrastructure, in accordance with the decarbonisation objectives of the EU and the regional interconnection goals. Their focus on innovative technologies and control algorithms directly contributes. While coal remains the dominant source of electricity generation in 2024, the government is committed to structural reforms, diversification, and aligning with EU climate and energy market integration goals. Identifying key items that can be efficiently produced in Serbia is essential for tapping into the European renewable.
