

# Energy storage for power distribution in Romania

## Overview

---

Romania aims to stabilize its grid with a massive investment. Private company MASS Group Holding plans to invest over €1 billion (~\$1.18 billion) in large-scale battery energy storage projects in Romania, after reaching an agreement with the Romanian government, Reuters reported Wednesday. The Romania should boost the power of its electricity storage facilities to 2,000 MW by the end of next year, so as to smooth the imports experienced these days during peak consumption periods, minister of energy Bogdan Ivan stated, quoted by ProTV. The existing capacities increased from just 82 MW. Romania expects its overall energy storage to amount to at least 2. These ambitious energy storage targets are aligned with transmission. The present report analyses the status, challenges, and opportunities for energy storage in Romania, focusing on technological, regulatory, financial, and business aspects. For investors considering projects here, understanding the local legal regime is essential —laws are evolving fast, new incentives are being offered, and.
