

Energy storage regulations bucharest

Overview

On July 8th, Romania's Energy Regulatory Authority (ANRE) officially approved new regulations abolishing double taxation on battery energy storage systems (BESS). The move aims to accelerate energy storage project deployment and enhance grid resilience. For investors considering projects here, understanding the local legal regime is essential —laws are evolving fast, new incentives are being offered, and. On 21 November 2024, the Romanian government approved a new Government Emergency Ordinance (GEO 134/2024) promoting the elimination of double charging and stimulating the development of energy storage technologies to ensure the transition to a low-carbon economy by amending Electricity Law 123/2012. The National Energy Regulatory Authority of Romania has approved a regulation eliminating double taxation of energy storage, to allow for faster deployment of solutions for storing electricity.

Energy storage regulations bucharest

[Bucharest energy storage development plan update](#)

Such enhanced legislation is needed for implementing the Romanian National Energy and Climate Plan (NECP), which lists 'developing storage capacities' as an instrument to improve ...

[Romania's ANRE Approves Regulations to Support Energy Storage ...](#)

The National Energy Regulatory Authority (ANRE) in Romania has recently approved a series of regulations aimed at eliminating double taxation on stored electricity reintroduced into the grid.

[Romania Abolishes Double Taxation on Energy Storage, Accelerating ...](#)

On July 8th, Romania's Energy Regulatory Authority (ANRE) officially approved new regulations abolishing double taxation on battery energy storage systems (BESS). The move aims to ...

[Romania removes double taxation of stored electricity from the legal](#)

One of the most important legislative changes addressed by GEO 134/2024 is the elimination of double taxation of stored energy. Until the enactment of the new GEO, stored energy ...

Romania's Energy Storage

An advanced draft of the present report was critically discussed with relevant Romanian stakeholders (TSO, energy regulator, Ministry of Economy, Energy and the Business Environment, DSOs, ...

[Romania's Energy Storage: Assessment of Potential and](#)

This report analyses the potential of some of the main energy storage technologies, presenting their respective advantages and disadvantages that need to be considered when evaluating the likelihood, ...

[Romania ends double taxation of energy storage](#)

The National Energy Regulatory Authority of Romania has approved a regulation eliminating double taxation of energy storage, to allow for faster deployment of solutions for storing ...

[First technical regulation for storage in Romania](#)

As storage seems essential on the long term in supporting transformation of the rigid old infrastructure to a more flexible one, some have actually wondered if storage could be imposed as ...

[Regulatory breakthrough: Romania lifts barriers on battery storage](#)

Romania has taken a decisive regulatory step in favor of its clean energy transition, removing the double taxation that hindered the development of battery energy storage systems.

[Romania Renewable Energy Storage Regulations: Key Insights for ...](#)

Romania is emerging as a key market for renewable energy storage. Explore the main laws, incentives, and opportunities shaping investments in batteries and hybrid storage projects.
