

Environmental issues of solar-powered communication cabinet inverters

Overview

Recent investigative reports have uncovered concerns in the renewable energy sector: rogue communication devices found embedded within solar power inverters and batteries, many of which are manufactured overseas and distributed globally. A reported backdoor in solar hardware has set off alarms from Washington to Brussels over foreign control of key energy infrastructure. Solar panels fields on the green hills stock photo. The piece provides real-world attack scenarios from a business owner's perspective, analyzes the broader. U. energy-sector forensic teams have begun disassembling Chinese-manufactured solar inverters and grid-scale batteries after discovering undocumented 4G/LTE modules and other wireless communication transceivers buried on the circuit boards, according to two people involved in the tear-downs. The. LONDON (Reuters) -U.
