

Garbage cleaning under photovoltaic panels

Overview

Cleaning under solar panels involves removing any debris like leaves or branches that may have collected there. You should avoid using water, as it can leave residue or streaks on. When materials like dust, pollen, or bird droppings cover your panels, they block sunlight from reaching the photovoltaic (PV) cells. This effect, known as “soiling,” is a direct cause of performance loss. Here are some practical methods to tackle this task effectively. Here's a list of items that will make the job easier: Cleaning under solar panels. In this guide, we'll cover how to clean solar panels safely and effectively, how often maintenance is needed, and how proper care helps you get the most value from your solar investment. Why Do You Need to Clean Solar Panels?

Solar panels are built to withstand the elements, but they don't clean.
