

Greek battery energy storage supplier

Overview

Faria has signed a loan agreement with Greek bank Attica Bank to finance the BESS, valued at €28 million (\$32). Construction is expected to be completed in the third quarter of this year, and the battery will be connected to a 150/20 kV high-voltage substation currently. Sunlight Group Energy Storage Systems is a prominent provider of innovative energy storage solutions, specializing in lithium-ion and lead-acid batteries for various applications, including renewable energy storage systems (ESS). Greek renewable energy company Faria Renewables is looking to the financial sector for backing to build its planned battery energy storage system (BESS). This report is part of a series that analyses the battery storage market in select European countries. While Greece currently has virtually no utility-scale battery storage capacity installed, the country's project pipeline points to explosive growth in the coming years. The government is now working a new plan, which will allow the colocation of batteries with existing solar plants as well as standalone, in front of the meter battery energy storage.
