

Home solar power generation investment income

Overview

The income potential for owners of home-based solar power installation businesses varies significantly, but a typical range for owner earnings is between \$75,000 and over \$200,000 annually. 1 Installation costs are dropping, too. This is on par with or. Tax benefits are available to taxpayers who generate their own electricity from solar power generation systems whether the system is for personal or business use. That means monthly savings and long-term returns.
