

How long can the battery installed inverter be released

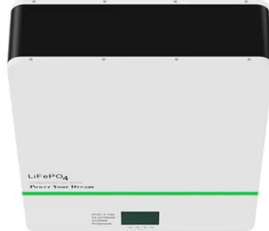

Overview

It will deplete the quality of the electrolyte, which in turn would reduce its storage capacity. Here at Livguard, we have some practices that we recommend, especially for tubular inverter. This is because if you store your battery without charging it, the inverter discharge is going to decrease your battery's lifespan significantly. For a long battery life of an inverter, you need to charge it. How long can you leave an inverter on?

In the case of hybrid inverter, it stored the energy collected from the local power grid in the battery.
