

How many 4G base station sites are there in Chad

Overview

There are three MNOs (Airtel, Maroc Telecom and Sotel) and approximately 1,500 towers in Chad, a country where just 26% of its geography has mobile coverage, 65% population coverage and mobile penetration under 50%. Tigo sold their Opco to Maroc Telecom in July 2019. Local news reports say that within one month Airtel intends to expand microwave connection capacity, replace generators that have reached the end of their useful life, boost radio capacity on 89 4G sites, upgrade router ports in the capital N'Djamena to 100G, and modernise former state-owned. 3G/4G coverage of population is around 25% with Tigo and Airtel, 4G/LTE is only available in major towns. According to the regulator towns are covered by 2G, and mostly 3G, rural areas and roads have long uncovered stretches. General GSM coverage of population is only around 85% by both providers. Explore network coverage by operator and country, and more! What is OpenCellID?

OpenCellID is working towards creating an open cellular dataset that is driven and inspired by the community. This cellular data is used for a multitude of commercial/private purposes by patrons worldwide. Improved Telecom Infrastructure Michel also announced plans to deploy 200 telecom sites with 3G and 4G capabilities to improve nationwide coverage.
