

# How many energy storage battery factories are there in the United States

## Overview

---

In 2019, just two battery factories were operating in the United States with another two under construction. was projected to reach almost 30 gigawatts by the end of 2024. Due to increases in demand for electric vehicles (EVs), renewable energies, and a wide range of consumer goods, the demand for energy storage batteries has increased considerably from 2000 through 2024. Energy storage batteries are manufactured devices that accept, store, and discharge electrical. Battery manufacturers in the USA currently employ 34,891 workers across 292 companies, generating combined sales of \$52 billion. A large gigafactory can consume 2.
