

How many years can the photovoltaic inverter be guaranteed

Overview

Standard warranties range from 5 to 25 years, with most string inverter warranties covering 5 to 12 years, while microinverter warranties often last 20 to 25 years. For example, if a capacitor in the inverter. While solar energy systems are built to withstand decades of outdoor use, the right warranty coverage assures extra peace of mind by protecting your investment against potential malfunctions, damage, or underperformance. The installer is responsible for repairing or replacing the faulty product with a new one without any additional cost to the customer.
