This article breaks down pricing factors, installation costs, and market opportunities for thermal energy storage technologies in the Medi As Malta accelerates its transition to renewable energy, phase change energy storage (PCES) systems are emerging as a game-changing solution. This article. nt to Malta's energy storage system. The electricity drives a heat pump, which converts electrical energy into thermal energy y creating a temperature difference. The heat is then stored in molten salt, while th eady to move to long duration today. When coupled with renewables, Malta's. Option A - PV system with standard solar inverter: 50% of eligible costs up to a maximum of Euro 2,500 per system and Euro 625/kWp. Using proven subsystems, a locally sourced supply chain, and abundantly available materials like salt, the system delivers economical, clean energy with a flexible power and heat.
