

# How much does it cost to generate one kilowatt of solar power

## Overview

---

The cost of one kilowatt of solar energy is influenced by several factors, including installation costs, equipment quality, geographical location, and financial incentives; however, the average price falls between \$3,000 and \$4,500 per installed kilowatt. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. This typically translates to about \$2.50 per watt of installed capacity (more on price per watt below). The total price depends on your system size, location, roof type. Leverage the intricate breakdown of costs involved in producing 1 kilowatt of solar energy to understand the multifaceted nature of solar energy expenses. Uncover the key components influencing the total expenditure.

## How much does it cost to generate one kilowatt of solar power
