

# How much does it cost to produce solar panels in Saint Lucia

## Overview

---

Typical system prices and monthly energy production for 1 kWp, in Saint Lucia, range from US\$3000 to US\$4500 and around 125kWh. Prices for solar PV systems are constantly dropping. On average, the total annual sunlight amounts to 2,890 hours. 914 per kWh for the first 1-180 units. This guide provides a framework for estimating the key operational costs for a solar assembly plant in Saint Lucia. Moving beyond initial investment figures allows a prospective owner to build a financial model that accurately reflects the economic realities of operating in this strategic Caribbean. When selecting a location for a new solar module factory, entrepreneurs often prioritize factors like labor costs, logistics, and local tax incentives. While these are critical, a less obvious consideration can offer a decisive competitive edge: regional trade agreements. The initial capital investment, however, can be a significant hurdle. 34 per kilowatt-hour. In St. Lucia, solar power is quickly becoming a key player in driving economic growth and sustainability, providing an opportunity for the island to reduce its dependence on imported fossil fuels while fostering a green economy. The Growing Demand for Renewable Energy St.
