

# How much does it cost to wire a photovoltaic panel per megawatt

## Overview

---

Cost per watt falls between \$0.60, so a 1 MW system might cost \$800,000 to \$1. Professional expertise is essential for a safe and efficient solar. Market analysts routinely monitor and report the average cost of PV systems and components, but more detail is needed to understand the impact of recent and future technology developments on cost. Consequently, benchmark systems in the utility-scale, commercial, and residential PV market sectors. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. The average cost of a solar panel installation is approximately \$1 million to \$3 million per megawatt, 2. Factors like location and technology substantially influence pricing, 3. This work has grown to include cost models for solar-plus-storage systems. Solar farm costs vary based on the project size, equipment, labor rates, and site preparation.
