

# How much does solar energy cost in the netherlands

## Overview

---

On average, the cost of solar panels in the Netherlands ranges from €3,000 to €8,000 per kWp (kilowatt peak) installed. This price range includes the complete installation cost, including materials, labor, and VAT (value-added tax). The Dutch government extended the Investment Subsidy for Sustainable Energy (ISDE), and there's up to €30 million available for the purchase and installation of solar panels. What your exact investment and payback period are, depend on your wishes and what suits you best. The yield of a roof facing east or west is still 125 kWh per m<sup>2</sup>. The Netherlands is known for scattered showers, abundant waterways, and.
