

# How much money can you make from solar power generation per watt

## Overview

---

This formula estimates your net daily profit by multiplying the energy your solar farm generates and sells, then subtracting your costs. Community solar offers a different approach, allowing individuals to purchase shares of larger solar installations. These projects typically range from 1-5 MW and serve. Initial setup costs range from \$800 to \$1,200 per kW of capacity while operating costs are typically low. How Much Does it Cost to Build a Solar Farm?

Assuming you already have the land to build a solar farm on, the installation cost typically ranges between \$. This is because many different factors come into play, such as how big the project is, how well it's run, where it's located, and the specific terms of their Power Purchase Agreements (PPAs). According to LevelTen Energy's P25 national index, Solar power trades at about \$52 per megawatt-hour in 2024.
