

How to sell solar photovoltaic power

Overview

Learn how to sell solar effectively using smart marketing tactics, digital tools, and personalized strategies that help close more solar deals, faster. Self-consumption beats exports – Maximizing the solar electricity you use directly in your home typically provides better financial returns than exporting excess to the grid, especially with time-of-use rates and battery storage becoming more common in 2025. Federal tax credit uncertainty looms –. You can sell excess solar energy back to the grid through net metering programs, earning credits worth \$0. According to the Solar Energy Industries Association (SEIA), properly configured solar systems can generate 25-40% excess energy during peak production. As solar energy becomes more popular, many homeowners are finding ways to turn their solar panel systems into a source of income by selling power back to a utility company. The Modernize Mission We help homeowners make confident decisions through our reliable, up-to-date, and unbiased information and average project costs.
