

How to take out two batteries from the battery cabinet

**Efficient
Higher Revenue**

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPP Trackers, 150% DC Input Oversizing
- Max. PV Input Current 16A, Compatible with High Power Modules

**Intelligent
Simple O&M**

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

**Flexible
Abundant Configuration**

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc-fault is detected the inverter immediately stops operation

Overview

Over tightening could crack the battery case. 3 Disconnect the red, positive cable at Primary Battery (RH) – then wrap insulation material. If you're looking to take off two batteries from your camper, it's likely that you're either replacing them or upgrading your camper battery system. Camper batteries are essential for storing and providing power for your RV's 12-volt electrical system when external power sources are unavailable. Once you have identified that you have even one bad battery, it is advisable to replace both batteries unless the one good battery is relatively new. Since the batteries are connected in parallel, if one battery has been bad for awhile it most likely has resulted in the other battery carrying a. On the 1000 mm wide classic battery cabinet, remove two screws to open the left door. Lockout/Tagout the battery breaker in the OFF (open) position.
