

# How to turn on the photovoltaic panel controller

## Overview

---

Turning on your solar panels typically requires a few simple steps you can complete between 15-30 minutes. The process will include: Finding your breaker box and turning on the solar breaker. It's quite simple to figure out, and. How long should the equalization process take?

The Maximum Equalization Duration sets the length of time for the equalization process. Here's a quick overview of what you can expect the solar activation process to look like: How long to allot: Plan on less than 15. View user manuals for all Solar Controller and Accessories, including PWM and MPPT solar controllers. The question of how to connect a solar panel to a charge controller usually comes from customers who want to build a small DIY off-grid system on their own. Let's start by gathering the parts.
