

Huawei Argentina solar Energy Storage Industry

Overview

Chinese giant Huawei has introduced the LUNA2000-215 kWh system in Argentina for the commercial and industrial sector, aiming to reduce energy consumption, increase autonomy, and lower the carbon footprint. In partnership with Green Fusion, the technology company presented a modular solution at the Polo Industrial Ezeiza capable of reducing operational costs by 60% and ensuring production continuity in the face of power supply outages with energy storage. The energy storage system can employ a variety of energy storage methods and temperature control modes to maximize energy. Huawei outdoor power solutions are designed for carrier ICT sites. The all-in-one system supports multiple input (grid/PV/genset) and output (12/24/48/57 V DC, 24/36/220 V AC) modes.
