

Increased renewable energy penetration grenada

Overview

The PURC launched its pilot SSIPP programme in 2021, allowing for investments in the renewable energy space. This programme sought greater penetration of green energy into Grenada's national grid, which will be facilitated by the Grenada Electricity Services Limited (GRENLEC). Andrew Millet. -The renewable energy target was updated in 2023 to 100% by 2035 for electricity generation from the previous target of 100% by 2030 for Electricity and Transportation outlined in the 2011 National Energy Policy. The 2015 electricity rates in Grenada are. The International Renewable Energy Agency (IRENA) is an intergovernmental organisation that supports countries in their transition to a sustainable energy future, and serves as the principal platform for international cooperation, a centre of excellence, and a repository of policy, technology. Grenada Electricity Services (Grenlec) is pleased to announce that it is currently exploring opportunities that would boost utility-scale renewable energy penetration in Grenada. George's. Known as the "Spice Isle" for its production of nutmeg and other spices, Grenada enjoys a tropical climate with abundant sunshine, making it a prime candidate for solar energy adoption.
