

# Intelligent Battery Cabinets for Data Centers in the Ten ASEAN Countries

## Overview

---

This white paper by Eco-Business, commissioned by Tai Sin Electric, explores the challenges and potential solutions to enhance energy efficiency, reduce carbon emissions and ensure that data centre growth aligns with the global drive towards decarbonisation. The ASEAN digital economy is expected to reach a value of USD 1 trillion by 2050, showcasing the vast opportunities for growth and investment in the region. Data centers are an integral part of the infrastructure for market digitalisation and economic growth. The four key aspects of a. Huawei and Keppel have signed a Memorandum of Understanding (MoU) to develop solar and battery energy storage system (BESS) projects for the data center and other high-energy-consuming sectors, initially focusing on the ASEAN region. The MoU will see the companies explore the design and development. Regional initiatives such as ENABLE, the ASEAN Power Grid Advancement Program (AIMS III), and the ASEAN Battery Technology Collaboration are further reinforcing these drivers. Collectively, they position BESS not as an optional upgrade, but as an essential pillar of Southeast Asia's energy and. On , the White Paper on Building Next Generation Data Center Facility in ASEAN, co-developed by the ASEAN Centre for Energy (ACE) and Huawei, was released at Global Data Center Facility Summit 2024 in Singapore. As these facilities become central to.
