

# Iran electric vehicle safety

## Overview

---

Are you looking for information on electric vehicle regulation and law in Iran?

This CMS Expert Guide provides you with everything you need to know. An electric car is charged at a roadside EV charge point, London, Octo. Despite promises in recent years by the Iranian government to import environmentally friendly cars into the country, there has been minimal to no efforts made, as the domestic car industry is mostly owned by the. The recently-adopted Clean AirAct (2017) mandates various ministries to work together on renewing the urban public transport fleet, including through incentives for hybrid and electric vehicles and electric motorcycles. It also exempts all locally-manufactured EVs from VAT. Now, the country is poised to revolutionize this sector with a strategic pivot toward electric vehicles (EVs), positioning itself as a competitive player. TEHRAN - Iran's Oil Ministry has initiated the development of electric vehicle (EV) infrastructure following a recent resolution by the Economic Council, aiming to diversify the country's fuel mix and improve energy consumption management. This move comes after the Economic Council approved a resolution mandating the integration of EV charging.
