

Is it good to have photovoltaic panels in front of the tomb

Overview

The installation of solar energy systems in the front area of a property faces several challenges including 1. Homeowner's Associations cannot restrict your ability to put solar panels on the front of your home if it is oriented in such a way that another roof would impede the solar panels' performance. This is part of Florida Statutes, and solidified by case law. Solar panels perform best when placed on. Solar panels offer a compelling mix of environmental benefits and financial incentives. Your decision should balance the allure of sustainability and long-term cost savings with the time, money, and effort to erect solar panels. The best location for solar would be the front of my roof, facing the street. I could put them in the back but that would apparently require about 30% more panels (more expensive) to get equivalent energy production.
